

Case Study: Increased Sperm Count after Vasectomy Reversal with FertilAid for Men and MotilityBoost

**Printed as received from customer via email on 11/28/12.*

My husband had a vasectomy reversal in March of 2012. In May he had his first semen analysis.

His results were:

Volume: 3.4 ML
 Count: 52.0 MIL/ Per ML
 Motility: 10%
 Total Motile Per EJAC: 17.7MIL
 Fwd progr: 1-2-3, Mild Agglutination, mild round cells <1.0ML

PARTNER NAME:		OFFICE LOCATION:	Tempe Andrology
PARTNER ID/DOB:	/	DAYS ABSTAINED:	3 Day(s)
ANALYZED BY / TIME:	/ 03:25 PM	COLLECTION LOCATION:	Center
RELEASED BY / TIME:	/ 04:10 PM	COLLECTION METHOD:	EJACULATE
SOURCE:		COLLECTED IN / TIME:	Sterile Cup / 02:45 PM
CONTAINER:	S/P C8827 4	LAB ROOM TEMP:	24 °C

PARAMETER	PATIENT VALUE	REFERENCE VALUE
VOLUME	3.4 ML	1.5-5.5 ML
COUNT	52.0 MIL/ML	20-250 MIL/ML
MOTILITY	10 %	>= 40%
TOTAL MOTILE/EJAC.	17.7 MIL/EJAC.	>20 MIL/EJAC.

COMMENTS: fwd progr: 1-2-3 / mild agglutination / mild round cells (< 1.0M/mL) / referred by: [REDACTED]

For the very first test post-reversal the doctor was encouraged by the numbers and slightly worried about the motility (he was sure it would all come up on its own). Second test was done in June. His results were:

Volume: 2.7ML
 Count: 49.0MIL/ Per ML
 Motility: 15%
 Total Motile per EJAC: 19.8MIL
 Foward Progression: 0-2, Agglutination 2+

PARTNER NAME:		OFFICE LOCATION:	Tempe Andrology
PARTNER ID/DOB:	/	DAYS ABSTAINED:	4 Day(s)
ANALYZED BY / TIME:	/ 02:45 PM	COLLECTION LOCATION:	Center
RELEASED BY / TIME:	/ 02:55 PM	COLLECTION METHOD:	EJACULATE
SOURCE:		COLLECTED IN / TIME:	Sterile Cup / 02:15 PM
CONTAINER:	S/P C8827 4	LAB ROOM TEMP:	24 °C

PARAMETER	PATIENT VALUE	REFERENCE VALUE
VOLUME	2.7 ML	1.5-5.5 ML
COUNT	49.0 MIL/ML	20-250 MIL/ML
MOTILITY	15 %	>= 40%
TOTAL MOTILE/EJAC.	19.8 MIL/EJAC.	>20 MIL/EJAC.

Doctor was still hopeful for improvement at this point, but we were not and we did not test again until September. Here are the September results:

Volume: 2.8ML
 Count: 59.2Mil/ Per ML
 Motility: 7%
 Total Motile per EJAC: 11.6MIL
 Fwd Progression: 1-2-3, Mild agglutination, Few round cells

PARTNER NAME:		OFFICE LOCATION:	Tempe Andrology
PARTNER ID/DOB:	/	DAYS ABSTAINED:	3 Day(s)
ANALYZED BY / TIME:	/ 11:25 AM	COLLECTION LOCATION:	Center
RELEASED BY / TIME:	/ 11:31 AM	COLLECTION METHOD:	EJACULATE
SOURCE:		COLLECTED IN / TIME:	Sterile Cup / 10:50 AM
CONTAINER:	S/P C8827 4	LAB ROOM TEMP:	24 °C

PARAMETER	PATIENT VALUE	REFERENCE VALUE
VOLUME	2.8 ML	1.5-5.5 ML
COUNT	59.2 MIL/ML	20-250 MIL/ML
MOTILITY	7 %	>= 40%
TOTAL MOTILE/EJAC.	11.6 MIL/EJAC.	>20 MIL/EJAC.

The Doctor was no longer hopeful and officially diagnosed DH with Low Motility and suggested IUI. He also said he had heard of some people that were having some success raising their numbers by using FertilAid and Motility Boost. He suggested we go ahead had try it for two months then re-test. We bought both FertilAid and Motility Boost and Dh started taking it right away. I was not very hopeful and I was afraid of what the results would be as I felt this was our last hope. Well I got the results today of the test done on 11/21 and here they are.

Volume: 2.9ML
 Count: 112.5MIL/ Per ML
 Motility: 50%
 Total Motile/ Per EJAC: 163.1MIL
 Foward Progression: 2-3, NO AGGLUTINATION

PARTNER NAME:		OFFICE LOCATION:	Tempe Andrology
PARTNER ID/DOB:	/	DAYS ABSTAINED:	3 Day(s)
ANALYZED BY / TIME:	/ 12:30 PM	COLLECTION LOCATION:	Center
RELEASED BY / TIME:	/ 12:33 PM	COLLECTION METHOD:	EJACULATE
SOURCE:		COLLECTED IN / TIME:	Sterile Cup / 11:55 AM
CONTAINER:	S/P C8827 4	LAB ROOM TEMP:	25 °C

PARAMETER	PATIENT VALUE	REFERENCE VALUE
VOLUME	2.9 ML	1.5-5.5 ML
COUNT	112.5 MIL/ML	20-250 MIL/ML
MOTILITY	50 %	>= 40%
TOTAL MOTILE/EJAC.	163.1 MIL/EJAC.	>20 MIL/EJAC.

COMMENTS: FORWARD PROGRESSION 2-3 / NO AGGLUTINATION NOTED sr... [REDACTED]

WOW - Everything went up. Even the Doctor was shocked. He said we need to re-test two more times to make sure it stays up but everything looks good for baby making. I wrote this review because I know there is another woman out there just like me wanting a baby so bad she will do just about anything. Well dear, if you need hope for better numbers here it is. This stuff clearly works. After 5 months my DH numbers were consistently low. So glad that my Dh started taking these pills. Good Luck to all reading this. Sending Lots of Baby Dust your way!!!
